

Twilio Keys

Follow these steps to find the keys you need to set up co-browsing in Daktela. Once you have found your **3 keys**, send them to Daktela Support. They will authenticate your Twilio account for use with Daktela.

- [Account SID](#)
 - [App SID and APP Secret](#)
-

Account SID

1. Sign in to <https://www.twilio.com>.
 2. In the sidebar, go to [Programmable Video](#) (if you are signed in, simply click the link). The *Overview* page will open.
 3. In the top right corner, click **Show API Credentials**. Your credentials will appear.
 4. Copy your **Account SID** and send it to Daktela Support.
-

App SID and APP Secret

1. Sign in to <https://www.twilio.com>.
2. In the sidebar, go to [Programmable Video](#) → [Tools](#) → [API Keys](#) (if you are signed in, simply click the link).
3. Create a new API Key using the + button.
4. Enter a Key name.
5. Select **Standard** key type.
6. Click **Create API Key**.
7. Your API Key details will appear. Copy **SID** and **Secret** and send them to Daktela Support.

Important note

The secret is only shown **ONCE**. Make note of it and store it in a safe, secure location.

8. Check the checkbox before *Got it! I have saved my API Key Sid and Secret in a safe place to use in my application*.
 9. Click **Done**.
